OVERVIEW

Architectural Studies Specialist at the University of Toronto with an interest in how data and planning shapes the built environment. My coursework in computational design, math, and statistics has pushed me toward more analytical, problem-solving work, and I am interested in applying that to development, urban systems, and infrastructure.

EDUCATION AND CERTIFICATION

University of Toronto | Architectural Studies Specialist | Toronto, ON August 2025 – Present

- GPA: 3.85, Dean's List Scholar
- Relevant Coursework: Computation and Design, Linear Algebra, Calculus, Introduction to Computer Science

Quince Orchard High School | High School Diploma | Gaithersburg, MD August 2024 – May 2025

- Société Honoraire de Français, September 2024 – May 2025

University of Amsterdam | Pre-University Honours Programme: Sustainable Thinking | Amsterdam, NL July 2024

- Examined sustainable development and circular economy principles through urban planning and policy case studies.

Collège du Léman | Some High School | Geneva, CH August 2021 – June 2024

PROFESSIONAL EXPERIENCE

Operations Intern | Glenstone Museum | Potomac, MD June 2026 – August 2026

- Developed and refined 30+ training resources into a centralized learning plan for the Engineering team, strengthening operational resilience through daily facility checks and preventative maintenance.
- Shadowed various departments within the Operations Division, observing how their combined work supports the planning, logistics, and coordination of Glenstone's 300-acre campus.
- Sat in on multi-disciplinary meetings during the finalization of schematic design for a large-scale project, alongside reputable construction, design, engineering, and acoustics consultants.

AI Training Contributor | Data Annotation | Remote April 2026 - Present

- Evaluate Large Language Model (LLM) outputs and provide structured feedback to improve performance
- Flag edge cases, hallucinations, and unclear responses to refine evaluation guidelines

Shift Lead | Playa Bowls Darnestown | Gaithersburg, MD August 2024 - Present

- Supervised and coordinated a team of 4-6 employees in a high-volume environment
- Manage cash handling and inventory tracking to maintain accuracy
- Train new hires and coordinate workflows to improve team efficiency and customer satisfaction

Student Volunteer | All Special Kids (ASK) | Geneva, CH December 2023 – July 2024

- Collaborated with a licensed psychologist to facilitate weekly social skills groups for children with diverse needs
- Adapted activities to support varying developmental needs and assisted in leading summer camp programming

Summer Intern | Geneva International Centre for Humanitarian Demining | Geneva, CH August 2023 & July 2022

- Researched explosive ordnance risk education and engagement strategies for conflict-affected populations
 - Assisted in coordinating workshops and preparing documentation for humanitarian mine action initiatives
 - Developed and formatted briefing materials and attended professional briefings on mine action policy
-

PROJECTS

Breakwater Pavilion | Rhino 3D, AutoDesk Forma | University of Toronto Winter 2026

- Led coordination across a team of 3 engineering + 3 architecture students to develop a waterfront pavilion proposal for a real client, evaluating site constraints and environmental and structural considerations to inform decisions.

Parametric Development of Typology | Rhino 3D, Grasshopper | University of Toronto Fall 2025

- Developed a parametric model of a mixed-use typology in Grasshopper to analyze how variations in building height and corner conditions impact urban form across sites.

Optimizing Vegetation Presence in Toronto | Grasshopper, Rhino 3D | University of Toronto Fall 2025

- Designed a parametric façade system using solar vector analysis to optimize vegetation placement
 - Produced three seasonal outputs: a peak-growth default, a winter glass enclosure, and a rotational ability to maximize year-round sunlight exposure.
-

LEADERSHIP/INVOLVEMENT

Events Associate | Applied Engineering & Architecture Students Organization (AEASO) August 2026 – Present

Social Ambassador | Unify Social January 2026 – June 2026

- Promote a British Columbia-based social tech startup supporting newcomers and international students in Canada through campus outreach
- Produce weekly social media content driving brand awareness through firsthand international student experience

General Member | AEASO August 2025 – April 2026

- Attend workshops and networking events focusing on the intersection of architectural and engineering practices

Sustainability Floor Representative | New College, University of Toronto August 2025 – April 2026

- Organized sustainability-focused initiatives and community engagement events for 100+ residents
-

TECHNICAL SKILLS

Programming: Python

Computational Design: Rhino 3D, Grasshopper (Parametric Modeling)

CAD/BIM: AutoCAD

Quantitative: Linear Algebra, Calculus, Data Analysis, Spatial Analysis

Visualization: Adobe Suite (Illustrator, Photoshop)

Productivity: Microsoft Office Suite, Google Workplace

CERTIFICATIONS

Grasshopper Essential Training | LinkedIn Learning December 2025

Data Fundamentals | IBM SkillsBuild certificate November 2025

First Aid Certification | My Driving School, Geneva, CH Valid through 2029
